WO 2004/045520 A2

(54) Title: **COMPLEMENT RECEPTOR 2 TARGETED COMPLEMENT MODULATORS**

(57) Abstract: Modulation of the complement system represents a therapeutic modality for numerous pathologic conditions associated with complement activation. In a strategy to prepare complement inhibitors that are targeted to sites of complement activation and disease, compositions comprising a complement inhibitor linked to complement receptor (CR) 2 are disclosed. The disclosed are compositions can be used in methods of treating pathogenic diseases and inflammatory conditions by modulating the complement system.
